# RAGMAX - butterfly valves

## RAGMAX 1000 →

Extreme RAGMAX coating on St/St base disc complete with PECU High wear liner and S/S431 shaft.

Developed for the ultimate protection against wear, ideal for heavy slurries in control and on/off applications.

## RAGMAX 2000 →

Standard RAGMAX coating on St/St base disc complete with PECU High wear liner and S/S431 shaft.

Developed for protection against wear, ideal for medium to heavy slurries in control and on/off applications.

## RAGMAX 3000 →

Standard RAGMAX coating on GGG40 base disc complete with PECU High wear liner and S/S403 shaft.

Developed for protection against wear, ideal for light to medium slurries in control and on/off applications.

## RAGMAX 4000 →

Standard St/St disc complete with PECU High wear liner and S/S403 shaft.

Developed for protection against liner wear, ideal for dirty water or where EPDM liners fail in control and on/off applications. PECU approximate 50 times more wear resistant than EPDM.

## RAGMAX 5000 →

Standard St/St disc complete with EPDM liner and S/S403 shaft.

Standard Butterfly valve for water and air control and on/off applications.

## RAGMAX 6000 →

Standard GGG40 Rilsan Coated disc complete with EPDM liner and S/S403 shaft.

Standard Butterfly valve for clean water and air control and on/off applications.

## RAGMAX 7000 →

Standard St/St disc complete with Silicone High temperature liner and S/S403 shaft.

Developed for the protection against high temp air and water control and on/off applications.
